

We claim:

1. A disposable pant-like undergarment comprising:

5 a) a stretchable front panel having a first end, a second end, a first side edge, a second side edge, a first elastic band secured along said first end, and a second elastic band secured along said second end;

b) a stretchable back panel having a first end, a second end, a first side edge, a second side edge, a third elastic band secured along said first end, and a fourth elastic band secured along said second end;

10 c) an absorbent assembly including a liquid pervious bodyside liner, a liquid-impervious outer cover, and an absorbent positioned therebetween, said absorbent assembly being secured to said stretchable front and back panels, and said absorbent assembly capable of being folded to enable said front panel to overlap said back panel; and

15 d) a pair of seams joining said stretchable front and back panels together at said first and second side edges to form a pant-like undergarment having a waist opening and a pair of leg openings, said first and third elastic bands creating a waist band located adjacent to said waist opening and said second and fourth elastic bands creating a pair of leg bands located adjacent to said pair of leg openings, and said fourth elastic band
20 having a stretching force that is greater than that of said second elastic band.

2. The disposable pant-like undergarment of claim 1 having an exterior surface and an interior surface, and said waist band is located to said exterior surface and said pair of leg bands are located on said interior surface.

25

3. The disposable pant-like undergarment of claim 1 wherein said fourth elastic band has a contraction force that is greater than that of said second elastic band.

4. The disposable pant-like undergarment of claim 1 wherein said fourth elastic band has
30 a stretching and contraction force that is greater than that of said first elastic band.

5. The disposable pant-like undergarment of claim 1 wherein said fourth elastic band has a stretching and contraction force that is greater than that of said third elastic band.

35 6. The disposable pant-like undergarment of claim 1 wherein said fourth elastic band has a stretching and contraction force that is greater than that of said front panel.

7. The disposable pant-like undergarment of claim 1 wherein said fourth elastic band has a stretching and contraction force that is greater than that of said back panel.

5 8. The disposable pant-like undergarment of claim 1 wherein said first elastic band extends between said first and second side edges of said front panel and said third elastic band extends between said first and second side edges of said back panel.

9. The disposable pant-like undergarment of claim 1 wherein said second and fourth
10 elastic bands are overlapped by said absorbent assembly.

10. A disposable pant-like undergarment comprising:

a) a stretchable front panel having a first end, a second end, a first side edge, a second side edge, a first elastic band secured along said first end and extending between
15 said first and second side edges, and a second elastic band secured along said second end and extending between said first and second side edges;

b) a stretchable back panel having a first end, a second end, a first side edge, a second side edge, a third elastic band secured along said first end and extending between said first and second side edges, and a fourth elastic band secured along said
20 second end and extending between said first and second side edges;

c) an absorbent assembly including a liquid pervious bodyside liner, a liquid-impervious outer cover, and an absorbent positioned therebetween, said absorbent assembly being secured to said stretchable front and back panels, and said absorbent assembly capable of being folded to enable said front panel to overlap said back panel;
25 and

d) a pair of seams joining said stretchable front and back panels together at said first and second side edges to form a pant-like undergarment having a waist opening and a pair of leg openings, said first and third elastic bands creating a waist band located adjacent to said waist opening and said second and fourth elastic bands creating a pair of
30 leg bands located adjacent to said pair of leg openings, and said fourth elastic band having a stretching force that is at least 1.2 times greater than that of said second elastic band.

11. The disposable pant-like undergarment of claim 10 wherein said fourth elastic band
35 has a contraction force that is greater than that of said second elastic band.

12. The disposable pant-like undergarment of claim 10 wherein said second and fourth elastic bands are overlapped by said absorbent assembly.

13. The disposable pant-like undergarment of claim 12 wherein said second and fourth elastic bands are rendered non-elastic where they are overlapped by said absorbent assembly.

14. The disposable pant-like undergarment of claim 10 wherein said waist band contains a number of elastic strands and each of said pair of leg bands contains a lesser number of elastic strands.

15. The disposable pant-like undergarment of claim 14 wherein said waist band contains the same number of elastic strands as each of said pair of leg bands.

16. A disposable pant-like undergarment comprising:

a) a stretchable front panel having a first end, a second end, a first side edge, a second side edge, a first elastic band secured along said first end and extending between said first and second side edges, and a second elastic band secured along said second end and extending between said first and second side edges;

b) a stretchable back panel having a first end, a second end, a first side edge, a second side edge, a third elastic band secured along said first end and extending between said first and second side edges, and a fourth elastic band secured along said second end and extending between said first and second side edges;

c) an absorbent assembly including a liquid pervious bodyside liner, a liquid-impervious outer cover, and an absorbent positioned therebetween, said absorbent assembly being secured to said stretchable front and back panels, and said absorbent assembly capable of being folded to enable said front panel to overlap said back panel; and

d) a pair of seams joining said stretchable front and back panels together at said first and second side edges to form a pant-like undergarment having a waist opening and a pair of leg openings, said first and third elastic bands creating a waist band adjacent to said waist opening and said second and fourth elastic bands creating a pair of leg bands adjacent to said pair of leg openings, and said fourth elastic band having a stretching force that is at least 1.5 times greater than that of said second elastic band.

17. The disposable pant-like undergarment of claim 16 wherein said fourth elastic band has a contraction force that is greater than that of said waist band.

5 18. The disposable pant-like undergarment of claim 16 wherein said waist band is wider than each of said pair of leg bands.

19. The disposable pant-like undergarment of claim 16 wherein said waist band has a width and each of said pair of leg bands has a width and the width of said waist band is equal to the width of each of said pair of leg bands.

10

20. The disposable pant-like undergarment of claim 16 wherein said waist band has a width and each of said pair of leg bands has a width and the width of said waist band is less than the width of each of said pair of leg bands.

15 21. The disposable pant-like undergarment of claim 16 wherein said waist band contains a number of elastic strands each of which is capable of being stretched at least 200% from an initial length and each of said pair of leg bands contains a number of elastic strands, each of which is capable of being stretched at least 200% from an initial length.
